REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant has convincingly demonstrated that the luciferase gene insertion into the Sendai vector of Hasan et al. is positioned 3' to viral genes and not 5', which is required by the claims. It is also noted that Hasan et al. teach that genome-sense recombinant viruses are much less efficient, see the bridging paragraph on page 2813. However, data in the specification clearly indicates that the level of foreign gene expression is dependent upon the location of the insertion within the Sendai virus genome and that the level of foreign gene expression can be predicted, see Figure 5 for example. These unexpected results render insertion of a foreign gene into a Sendai virus vector un-anticipated and un-obvious in view of the teachings in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
